ID	Identification number of the Test Case

1. Introduction

The test plan document exhibits test cases (that can be found in Chapter 2, organized in a table), which have a set of test data, preconditions, and expected results, developed for a particular scenario to verify compliance against a specific feature of our software solution. The test cases are based on tasks and actions that the end users are expected to be performing of a regular basis.

2. Test Cases

ID	Name	Pre-Condition	Test Data	Expected Result	Actual Result
TC-01	User creates an account	User has opened the website	Name: Test User, Email: tu1@gmail.com, Password: user, Phone: +31874052359	An account with the provided information is created.	TBD
